Subject: Re: [Delta_Council_Information] Delta Stewardship Council Press Release - Independent

Contractor Will Assist in Review of BDCP

Importance: High

Mr. Eric Alvarez, Staff.....One simple question that is pertinent to the Independent Contractor 's work.....How many years of on-site and hands on experiences does the Independent Contractor have in doing its work to manage and fix the Bay Delta Estuary.....There must be extensive long term experiences by the Contractor's staff that dates back to the pre-project Shasta Project; Trinity Project; Friant Dam Project and Oroville Project Period and the manner in which the Sacramento River and San Joaquin Rivers flowed into the Delta and the Pacific Ocean, and also the commercial salmon and sportfishing industries of the 1930s, 40s, 50s.

Computer background work lacks the personal touch to manage and fix the Bay Delta Estuary and California Central Valley endangered salmon and threatened fisheries.

You cannot fool old Californians with historic experiences.

Please advise the members of the Council regarding this e-mail memo and place it into the records. Thank you.

Respectfully

Robert J. Baiocchi, President, Age 79
